# Duplicating of Sauna Lock Cards

If you are a manager of a sauna club, you could meet losing a sauna lock card. In this case, you have to damage the lock. If you Please use duplicator, to avoid damaging the lock in case the sauna lock card is lost.

Before you buy a duplicator, you must confirm the types of your sauna lock cards.

According to the following identification features, you could confirm the type of your cards easily. If you could not confirm the type of your cards, please send your cards with the lock to me to test it for you.

Normally, there are 3 main types of sauna lock cards, ie, low-frequency(125kHz), high-frequency(13.56MHz), and iButton (TM, Touch Memory). To the different type of your sauna lock cards, it is so easy for you to duplicate by use of the corresponding duplicator.

## 1. Low-frequency Sauna Lock Card

The working frequency of the types of cards is 125kHz.

Using Low-fre Duplicator, you could not only test the brands of your cards, but also duplicate them quickly. Only if you could test the type successfully, the card must be duplicated by the duplicator.

**Attention:** The duplicator is only copier, not a card. If you want to duplicate your card, you have to adopt a card or a simulator at least. So, you ought to select one from the next methods.

### 1.1 type B

**Feature Identification:** There is a character "B" on the white wafer.

**Duplicating Method:** Buying a white wafer(type B) or simulator(type B), you could duplicate it by duplicator at once.

### 1.2 type E

**Feature Identification:** There are characters "2015E" or "2016E" or "2017E" or "2018E" or "2019E" on the white wafer. If you have bought the duplicator, you

---

could test it very easily and quickly.

**Duplicating Method:** You have to use the simulator to duplicate the wafer, because the lock has remain the UID of card.

### 1.3 type T

**Feature Identification:** There is a or more character "T" or "57" on the white wafer. If you have a duplicator, you could test it by the test function.

**Duplicating Method:** Adopting the white wafer(T type) , you could duplicate it by duplicator maybe.

## 2. High-frequency Sauna Lock Card

The working frequency of the types of cards is 13.56MHz. Normally, before copying the card, the password of the card must be deciphered.

**Feature Identification:** There is a character "M" or several characters "20xxM".

---

**Duplicating Method:** After deciphering the passwords, you could duplicate it by use of the duplicator(type M) from your card to a new wafer(type M).

### 3. iButton

It is called TM(Touch Memory) also. It has unique ID also.

#### Feature Identification:

**Duplicating Method:** You could duplicate it from your iButton to an simulator by means of duplicator (TM type) .
